

High-Intensity LED Headlamp with Battery Pack

This high-intensity LED headlamp features a separate battery pack. It is designed for hands-free illumination in various environments.

Product Overview

High-Intensity Illumination

The MY600 is a professional-grade high-intensity LED headlamp engineered for demanding environments where hands-free lighting is critical. Featuring a robust construction, this unit provides reliable, long-lasting light output suitable for industrial, maintenance, and outdoor applications. The design includes a separate, cable-connected battery pack to ensure balanced weight distribution and comfortable extended wear.
