

High-Intensity LED Tactical Flashlight

This high-intensity tactical LED flashlight is constructed from aircraft-grade aluminum for durability. It features multiple lighting modes, water resistance, and adjustable focus, making it suitable for demanding environments and various applications.

Product Overview

High-Performance Tactical Illumination

This high-intensity tactical LED flashlight is engineered for durability and reliability in demanding environments. Constructed from aircraft-grade aluminum, it features a textured grip for secure handling and an adjustable focus mechanism for versatile lighting. Ideal for security, law enforcement, and emergency use, it offers multiple modes and extended runtime.

Technical Specifications

Lighting Modes

- High
- Medium
- Low
- Strobe
- SOS

Body Material	Aircraft-grade aluminum
Durability Ratings	Water-resistant, Impact-resistant
Focus Adjustment	Yes

Power & Operation

Power Source	Rechargeable batteries
Control	Side switch
