

# High-Intensity LED Tactical Flashlight

This flashlight is designed for law enforcement and security professionals. It features a high-intensity LED for optimal brightness and long-range visibility.

## Product Overview

### High-Intensity Tactical Illumination

This high-intensity LED tactical flashlight is engineered for demanding environments, making it an ideal choice for law enforcement and security professionals. Constructed with a focus on durability and reliability, it features aircraft-grade aluminum housing that provides excellent impact resistance and compression strength. With versatile lighting modes and a long-lasting rechargeable battery, this tool ensures consistent performance in critical situations.

## Technical Specifications

Model	WF-A4
Dimensions	126 x 150mm
Brightness	100 lumens
Lamp Life	100000 hours

## Power & Performance

Battery Capacity	2200 mAh
High-Light Runtime	5 hours
Recharge Cycles	1000

## Features

### Tactical Capability

High-Intensity Beam • Self-Defense Capable

### Key Features

Waterproof, Compression Resistant, Shatter-Resistant, Rechargeable
