

High-Intensity LED Tunnel Light

This high-intensity LED tunnel light is designed for efficient illumination in enclosed environments. It features a robust construction and textured reflector for optimal light distribution.

Product Overview

High-Intensity LED Tunnel Lighting Solution

This high-intensity LED tunnel light is engineered for superior illumination in demanding enclosed environments. Featuring a robust construction paired with a precision-textured reflector, it ensures optimal light distribution and reliability. With dual high-output LED modules, this fixture delivers enhanced brightness while maintaining energy efficiency, making it an ideal choice for tunnels, underpasses, and similar infrastructure projects.

Technical Specifications

Key Features

- Robust construction
- Textured reflector for optimal distribution
- High-output LED modules
- Energy-efficient design

Light Source

Dual high-output LED modules

Recommended Applications

Tunnels, Underpasses, Enclosed Environments
