

High-Intensity LED Tunnel Light

This high-intensity tunnel lighting fixture is designed for optimal illumination in enclosed environments. It features a robust housing for durability and protection against environmental factors.

Product Overview

High-Intensity Illumination for Enclosed Spaces

The ZS002 High-Intensity LED Tunnel Light is engineered to provide superior visibility and safety in tunnels, underpasses, and confined environments. Its robust housing design ensures long-term durability against harsh environmental conditions, while the advanced high-efficiency reflector maximizes light distribution. This lighting solution is specifically designed to meet the demanding visibility requirements for vehicular and pedestrian traffic.

Product Features

Core Advantages

High Intensity, Robust Housing, High-Efficiency Reflector, Enclosed Environment Optimized

Technical Specifications

Primary Applications

- Tunnels
- Underpasses
- Confined Roadways
- Pedestrian Walkways
