

High-Intensity LED with Clear Lens

This is a high-intensity light emitting diode (LED) with a clear lens. It features four leads for secure mounting and electrical connection.

Product Overview

High-Intensity LED Solution

This high-intensity light emitting diode (LED) is engineered for demanding electronic applications that require superior brightness and efficient light output. Featuring a clear lens design, it provides excellent visibility and performance. The component is equipped with four leads, ensuring both secure mounting and reliable electrical connectivity for professional integration.

Technical Specifications

Intensity

High-Intensity

Lens Type

Clear

Number of Leads

4

Application & Usage

Suitable Applications

Electronic Circuits, Display Systems, General Illumination
