

# High-Intensity Yellow Housing Spotlight

This is a high-intensity spotlight designed for rugged use. It features a durable yellow housing and a large reflector for focused beam projection.

## Product Overview

### Professional High-Intensity Illumination

The S-300B spotlight is engineered for demanding professional applications where reliable, long-range illumination is essential. Featuring a robust yellow housing, it is designed to withstand rugged outdoor environments while providing a highly focused beam. Its ergonomic handle and textured grip ensure comfort and stability for extended use in emergency or field scenarios.
