

High Leverage Bolt Cutters

These bolt cutters are designed for cutting through bolts, rods, and other metal materials. They feature hardened steel blades, comfortable grip handles, and a compound action mechanism for increased cutting power.

Product Overview

Professional High Leverage Bolt Cutters

These high-leverage bolt cutters are engineered for industrial and maintenance applications requiring efficient cutting of bolts, rods, and various metal materials. The design incorporates a robust compound action mechanism that maximizes cutting force while minimizing user effort. Featuring hardened steel blades and ergonomic grip handles, these cutters provide long-lasting performance and reliability for construction and repair environments.

Technical Specifications

Blade Material	Hardened Steel
Mechanism	Compound Action

Key Features

Features	High Leverage, Hardened Blades, Ergonomic Grip, Compound Action
----------	---

Application Fields

Industry Usage

- Construction
- Industrial Maintenance
- General Repair
