

High-Leverage Linesman Pliers

These linesman pliers are designed for gripping, cutting, and bending wires and cables. They feature hardened cutting edges and forged steel construction for durability.

Product Overview

High-Leverage Linesman Pliers

These high-leverage linesman pliers are engineered for professional gripping, cutting, and bending of wires and cables in demanding electrical and construction environments. Constructed from premium alloy steel, they feature hardened cutting edges for long-lasting performance and precision. The tool is designed with user comfort in mind, incorporating a slip-resistant, ergonomic rubberized soft grip handle to enhance control during extended use.

Construction & Materials

Material	Premium Alloy Steel
Key Features	Hardened Cutting Edge, Slip-Resistant Design, High-Leverage Design

Ergonomics & Design

Handle Characteristics

- Ergonomic design
- Slip-resistant
- Permanent logo injected on handle

Handle Material	Rubberized Soft Grip
