Overview

High-Performance Stadium Lighting

This high-output LED sports field light is engineered for durability and superior illumination in large-scale outdoor environments. Featuring a modular design for simple maintenance and an IP66 waterproof rating, it ensures reliable performance in demanding conditions. With an efficacy of 150Lm/w and a wide range of power options, it provides an optimal, energy-efficient solution for stadiums, ports, and high-mast lighting applications.

Technical Specifications

Luminous Efficacy

150 Lm/w
Efficacy

Ingress Protection

IP66

Power Range

300W - 1250W

Warranty

5 years

Certifications

Certifications

CE, RoHS, DLC, FCC, UL

Design & Construction

Key Design Features

- Modular design for simple maintenance
- Convenient assembly and disassembly
- Adjustable mounting brackets for precise aiming
- Integrated heat sink for thermal management

Build Quality

High strength structure with corrosion-resistant polyester powder coating

Applications

Typical Applications

- Stadiums
- Sports fields
- High mast lighting
- Light towers
- Ports
