

High-Performance Alkaline Batteries

High-performance alkaline batteries are suitable for various electronic devices. These batteries provide reliable, long-lasting power and are mercury and cadmium-free.

Product Overview

High-Performance Alkaline Power

These high-performance alkaline batteries are engineered to provide reliable and long-lasting power for a wide range of electronic devices. Designed with environmental responsibility in mind, they are completely mercury and cadmium-free. Their consistent energy output ensures optimal performance for professional and consumer applications alike.

Technical Specifications

Key Performance Metrics

1.5 V
Nominal Voltage

Voltage	1.5 V
Environmental Compliance	Mercury-Free, Cadmium-Free
