

High-Performance Auto Engine

This high-performance auto engine is designed for a variety of applications. It features durable construction and an efficient design, ensuring reliable operation and long-lasting performance.

Overview

High-Performance Engine

This high-performance engine is engineered for versatility and reliability across various industrial applications. Featuring a robust and durable construction, it is designed to deliver consistent power and long-lasting performance. The unit comes fully equipped with essential components, including a fuel tank and air filter, ensuring it is ready for optimal functionality in demanding environments.

Technical Specifications

Horsepower

5.5 HP

Power Output

Model Identifier

168F

Applications

Primary Applications

Generators, Water Pumps, Industrial Equipment

Components

Included Components

- Fuel tank
- Air filter
