Product Overview

High-Performance Brake Solutions

These high-performance brake pads are engineered to deliver superior stopping power and exceptional durability for both buses and passenger cars. Designed to exceed national standards, the friction material is specially formulated to minimize noise and brake dust, ensuring a quiet and smooth driving experience. Built for reliability, these pads feature advanced heat dissipation capabilities to maintain consistent performance across diverse driving conditions.

Technical Specifications

Key Performance Features

- Exceeds national standards
- Low noise formulation
- Reduced brake dust
- Grooved surface for heat dissipation

Model Identifiers

89659F • JURID888FF 20

Vehicle Compatibility

Buses, Passenger Cars
