

High-Performance Clutch Disc

This high-performance clutch disc is designed for optimal power transfer and durability. It incorporates a sprung hub to dampen torsional vibrations and robust friction material for enhanced heat resistance and an extended lifespan.

Product Overview

High-Performance Clutch Disc

This high-performance clutch disc is engineered for optimal power transfer and superior durability in demanding automotive environments. It features a robust friction material that provides enhanced heat resistance and an extended operational lifespan. Designed with a precision-engineered sprung hub, it effectively dampens torsional vibrations to ensure smooth engagement and disengagement during operation.

Key Features

Performance Highlights

- Robust friction material for heat resistance
- Sprung hub design for vibration damping
- Precision-engineered for smooth engagement
- Extended service lifespan

Application

Automotive, High-Performance, Durable
