

High-Performance Clutch Kit

This high-performance clutch is designed for optimal power transfer and durability. It features a robust construction with enhanced friction materials for improved grip and reduced slippage.

Product Overview

High-Performance Clutch Engineering

This high-performance clutch kit is meticulously engineered for optimal power transfer and superior durability. Designed to withstand high torque and demanding driving conditions, it features robust construction and enhanced friction materials. This assembly provides the reliability and grip needed for automotive applications where performance is critical.

Kit Components

Included Components

- Pressure Plate
- Friction Disc
- Release Bearing

Performance Features

Best For

High Performance • Demanding Conditions

Key Attributes

High Torque Capacity, Enhanced Friction Material, Improved Grip, Reduced Slippage
