

High-Performance Communication Antenna

This high-performance antenna is designed for optimal signal reception and transmission. Its robust design and flexible base ensure reliable performance in various environmental conditions.

Overview

High-Performance Communication Antenna

The JBA-416 is a high-performance antenna engineered for optimal signal reception and transmission. Designed with a durable, sleek black finish, it ensures reliable performance across diverse environmental conditions. Its flexible base allows for straightforward installation and adjustment, making it an ideal solution for communication systems and radio equipment.

Technical Specifications

Design Qualities

High-Performance • Durable Construction • Sleek Black Finish

Model Number	JBA-416
Installation Features	Flexible Base, Easy Adjustment, Easy Installation

Applications

Primary Applications

- Communication Systems
- Radio Equipment
- General Antenna Solutions
