

High-Performance Engine for Industrial Applications

This high-performance engine is designed for various applications. It features a durable construction and efficient combustion system for reliable operation.

Overview

High-Performance Industrial Engine

This high-performance engine is engineered for reliable operation in demanding industrial applications. It features a robust construction with a newly designed fuel tank, air cleaner, muffler, and recoil starter for enhanced durability. Designed for optimal combustion efficiency, this unit provides consistent power output suitable for integration into various machinery and industrial equipment.

Technical Specifications

Bore x Stroke	70 x 55 mm
Compression Ratio	8.5:1
Displacement	212 cc

Performance Metrics

Power Output

7 hp Max Output	3600 rpm at Speed
---------------------------	-----------------------------

Torque Output

13.5 N.m Max Torque	2500 rpm at Speed
-------------------------------	-----------------------------

Capacities

Fluid Capacities

Fluid Type	Capacity	Unit
Fuel Tank	3.6	L
Oil Capacity	0.6	L

Logistics

Weight

- Gross Weight: 16 kg
- Net Weight: 15 kg

Container Loading Capacity

Container Type	Units
20GP	576
40HQ	1358

Dimensions	405 x 345 x 380 mm
------------	--------------------

Features

Upgraded Components	New Fuel Tank, New Air Cleaner, New Muffler, New Recoil Starter
---------------------	---
