Product Overview

High-Performance Commercial Grade Blender

This high-performance blender is engineered for versatility and durability, featuring a robust 1500W motor capable of reaching over 28,000 RPM. Designed with a 2.0L Tritan container and advanced safety features like a Hall sensor for container detection, it is built to handle demanding kitchen tasks. With multiple pre-programmed menus and intuitive slide controls, it provides precise blending for smoothies, hot soups, ice cream, and more.

Technical Specifications

Rated Power	1500 W
Working Power	1200 W
Voltage	220 V

Performance Metrics

Motor Performance

28000 RPM
Real RPM

80 dB
Noise Level

Cooling System

Integrated DC fan for cooling and noise reduction

Design & Build

Container Capacity	2 L
Container Material	Square Tritan
Container Thickness	7 mm
Blade Material	Kawazaki Stainless Steel

Features

Pre-programmed Menus	Smoothie, Ice Crush, Ice Cream, Vegetable, Hot Soup, Timer, Clean, Pulse
Control Interface	Slide Control for speed and time adjustment

Safety

Safety Functions

- Hall Sensor (No container detection)
- Magnet Ring
