

High-Performance Racing Bucket Seat

The racing bucket seat is engineered for superior comfort and support during high-performance driving. Featuring a high-bolstered design, it provides excellent lateral support and keeps the driver securely in place.

Product Overview

High-Performance Racing Bucket Seat

The SP12 racing bucket seat is meticulously engineered to provide superior comfort and critical support during high-performance driving. Featuring an advanced high-bolstered design, it ensures excellent lateral stabilization to keep drivers secure under intense cornering. Its ergonomic profile is specifically crafted to promote optimal posture and minimize driver fatigue during extended track sessions.

Technical Specifications

Key Features

- High-bolstered support structure
- Ergonomic postural design
- Integrated harness slots
- High-durability construction

Applications

Racing, Track Days, Performance Driving

Quality & Compliance

Durability Certification

Wear Resistant • High-Quality Materials
