Product Overview

High-Performance Brake Solutions

These high-performance brake pads are engineered for optimal stopping power and durability across various commercial and heavy-duty applications. Designed with advanced friction materials, they ensure consistent braking performance and excellent resistance to wear and fade. The product is fully certified to meet European ECE-R90 safety standards, ensuring reliability for professional use.

Technical Specifications

Key Performance Features

- Long service life
- Low dust emission
- Noise reduction technology
- High fade resistance

Certifications

ECE-R90

Compatibility

Compatible Vehicles

- Commercial vehicles
- Tractors
- Agricultural machinery

Manufacturing & Customization

Customization

Yes

Custom Development

Capable of developing new brake pads based on customer-provided samples or technical drawings.
