

High-Performance Water Pump for Irrigation

This high-performance water pump is designed for agricultural and industrial use. It features a robust engine for reliable operation and efficient water transfer, making it ideal for irrigation and drainage.

Overview

High-Performance Irrigation Pump

This high-performance water pump is engineered for efficient irrigation and water transfer in agricultural and industrial settings. Powered by a reliable 4-stroke, air-cooled engine, it delivers a consistent flow volume of 35 cubic meters per hour. Designed for durability and ease of use, it features a recoil start mechanism and a compact, portable frame suitable for demanding field operations.

Performance Metrics

Key Performance Indicators

35 m³/h

Flow Volume

26 m

Lift Height

6 m

Suction Depth

Technical Specifications

Inlet/Outlet Diameter	50 mm
-----------------------	-------

Engine Details

Engine Configuration

- 4-stroke
- Air-cooled
- Single cylinder
- 163cc Displacement
- Recoil Start

Fuel Tank Capacity	3.6 L
--------------------	-------

Physical Attributes

Dimensions	475 x 390 x 445 mm
------------	--------------------

Weight (Gross/Net)	27 kg / 25 kg
--------------------	---------------

Logistics

Container Loading Capacity

Container Type	Units
20GP	310
40HQ	720
