Overview

Professional Transducer Engineering

The WF series professional transducer is meticulously engineered for high-performance audio environments, offering exceptional sound reproduction and reliability. Designed for demanding applications, this 8-ohm speaker handles significant power to ensure clear, powerful output. Its robust construction makes it a dependable choice for sound reinforcement and public address systems.

Technical Specifications

Performance Metrics

1500 W

Peak Power Handling

800 W

Continuous Power

8 Ohm

Nominal Impedance

Design & Construction

- Large diaphragm design
- Treated paper material for efficient audio conversion
- Robust structural frame
- Substantial magnet assembly for voice coil drive

Application

Ideal Applications

Public Address Systems, Sound Reinforcement, Hi-Fi Speakers, Professional Audio
