

High Power LED Lamp

This high-power LED lamp is designed for efficient and bright illumination. It features a robust heat sink for optimal thermal management and extended lifespan.

Overview

High Efficiency Illumination

This LED high-power energy-saving lamp utilizes advanced diode light source technology to deliver superior light efficiency with significantly reduced power consumption. Designed for versatility, it features a large luminous area that eliminates glare, ensuring a comfortable lighting environment. With a focus on safety and environmental sustainability, this robust lighting solution is an ideal choice for various industrial and commercial applications.

Technical Specifications

Model Number	SD-BL-T05
Light Source	Diode

Features

Key Benefits	Energy Saving, High Efficiency, Low Glare, Eco-Friendly
Thermal Management	Yes

Logistics

Packaging	Carton
