

High-Power LED Vehicle Emergency Light

This high-power LED light is designed for vehicles requiring strong brightness. It is suitable for emergency and security applications, with any color available and a clear or amber lens.

Product Overview

High-Intensity Emergency Lighting

The High-Power LED Vehicle Emergency Light is a robust, high-intensity solution designed specifically for emergency and security vehicle applications. Engineered for maximum visibility, it features a dual-color configuration that provides effective warning signaling in critical situations. Built with durable, weather-resistant materials, this light ensures long-lasting performance and energy efficiency for police, emergency, and safety vehicles.

Technical Specifications

Primary Applications

- Emergency Vehicles
- Police Cars
- Security Vehicles
- Safety Lighting Systems

Light Technology	LED
Color Configuration	Red, Blue

Performance Features

Key Benefits

High Intensity • Energy Efficient • Durable Construction
