

High-Power Two-Way Loudspeaker System

This high-power loudspeaker system delivers exceptional audio performance for demanding live sound environments. It features dual 15-inch woofers and a 4-inch compression driver, ensuring extended low-frequency output and clear, smooth highs.

Overview

Professional High-Power Sound Reinforcement

This high-power, two-way loudspeaker system is engineered for demanding live sound applications, ranging from touring sound to fixed installations. Featuring dual 15-inch woofers and a high-performance compression driver, it delivers exceptional low-frequency output and clear, smooth highs. Designed for reliability and consistent coverage, this system is an ideal solution for clubs, venues, and professional audio setups requiring high-level performance.

Performance Metrics

Continuous Power Handling

1200 W

Continuous Power

Peak Power Handling

4800 W

Peak Power

Frequency Range

37 Hz - 20 kHz

Acoustic Components

Woofer Configuration

- Dual 380 mm (15 in) woofers
- Differential Drive technology

Compression Driver

102 mm (4 in) voice-coil, neodymium driver

Coverage Angle

75° x 50°

Applications

Recommended Applications

Touring Sound, Portable PA, Fixed Installations, Club Sound
