

High Precision Laser Cutting and Engraving Machine

This high-precision laser machine is designed for cutting and engraving various materials. It features a user-friendly interface, precise laser control, and a compact design.

Overview

High Precision Laser Cutting and Engraving

The CMC-6050V is a high-precision laser cutting and engraving machine engineered to meet the demands of small to medium-sized businesses. Designed for versatility, it handles a wide range of materials with exceptional accuracy and control. Its compact footprint combined with a user-friendly interface makes it an efficient solution for professional cutting and engraving workflows.

Technical Specifications

Design Highlights

- Compact design for space efficiency
- User-friendly interface
- Precise laser control system

Model Number	CMC-6050V
Core Functions	Laser Cutting, Laser Engraving
