

High-Precision Optical Sensor Light

This high-precision sensor light is designed for indoor optical applications. It features multiple BNC connectors for versatile connectivity, a digital display for parameter monitoring, and status indicator LEDs.

Product Overview

Precision Optical Performance

This high-precision optical sensor light is specifically engineered for sophisticated indoor optical applications. Designed for seamless integration into laboratory setups and complex industrial systems, it provides reliable and highly accurate sensing capabilities. The unit features integrated digital monitoring and versatile connectivity options to ensure consistent performance in scientific environments.

Technical Specifications

Model Identifier	GWS1002F-AA
Application Environment	Indoor Optical Workstation
Key Features	High-Precision, Laboratory Grade, Digital Monitoring, Indoor Rated

Connectivity & Interface

Connectivity Ports

- BNC Connectors
- Digital Parameter Display
- Status Indicator LEDs
