

High-Precision Slitting Saw Blade

This high-precision slitting saw blade delivers clean and accurate cuts on a variety of materials. The fine-tooth design reduces burr formation and improves surface finish.

Overview

Precision Cutting Performance

This high-precision slitting saw blade is engineered to deliver clean, accurate cuts across a diverse range of materials. Featuring a specialized fine-tooth design, it significantly reduces burr formation while ensuring a superior surface finish. Built from high-durability materials, this blade offers extended service life and consistent, reliable performance for professional metalworking, woodworking, and plastic fabrication applications.

Technical Specifications

Key Design Features

- Fine-tooth configuration
- Reduced burr formation
- High-durability construction
- Optimized for precision

Suitable Materials

Metal, Wood, Plastics

Performance

Surface Finish Quality

High Precision • Clean Cut
