

High-Pressure 3-Inch Manifold Cross

This high-pressure manifold cross is designed for demanding industrial applications. Constructed from robust materials, it can withstand extreme pressures and harsh environments.

Product Overview

High-Pressure Manifold Cross

This 3-inch high-pressure manifold cross is engineered for demanding industrial environments, providing a robust solution for fluid distribution. With a cold working pressure rating of 15,000 PSI, it ensures reliable performance in high-stress applications such as oil and gas or chemical processing. The unit features standard Fig. 1502 union connections, ensuring seamless integration into existing high-pressure piping infrastructure.

Technical Specifications

Nominal Size	3 inches
Union Type	Fig. 1502
Instrument Connection Size	3 inches
