

High-Pressure Air Blow Gun with Variable Airflow Control

This air blow gun is designed for efficient cleaning and dust removal. It features a durable metal nozzle for precise airflow control and an ergonomic handle.

Product Overview

Professional High-Pressure Air Blow Gun

This high-pressure air blow gun is engineered for efficient dust and moisture removal in industrial and workshop environments. Constructed with a durable stainless steel cast tube and a robust, high-strength handle, it is designed for longevity and reliable performance. The integrated brass pipe joint ensures a secure connection, while the variable airflow control allows for precise cleaning of machinery, electronics, and various work surfaces.

Technical Specifications

Available Nozzle Lengths

- 110mm
- 300mm

Key Features

Corrosion-Resistant • Variable Airflow Control • High Mechanical Strength • Moisture Removal

Material Composition

Stainless Steel, Brass

Connection Type

Built-in brass pipe joint
