

High Pressure Anti-Wear Hydraulic Oil

It is applicable to high pressure systems in engineering, construction, mining, and other machinery. This oil conforms to HF-O, Denison hydraulic oil, and Vickers m-2950-s standards.

Product Overview

High-Pressure Anti-Wear Performance

This high-pressure anti-wear hydraulic oil is engineered with premium hydrogenated base oils and advanced additive packages to ensure superior performance in demanding environments. It features exceptional fluidity, oxidation stability, and shear stability, which helps maintain system integrity during high-speed and high-pressure operations. Designed for long-term cleanliness, this formula effectively prevents wear and extends the service life of critical hydraulic system components.

Technical Specifications

Available Net Contents

- 3.5L
- 4L
- 16L
- 18L

Available Viscosity Grades

HM32, HM46, HM68

Key Features

Performance Benefits

Long-term Cleaning • Anti-wear Protection • High Pressure Stability • Excellent Filtration
