

High-Pressure Fuel Injection Pump

This high-pressure fuel injection pump is designed for diesel engines. It features a 1.5 liters per cylinder maximum displacement and 45kW per cylinder maximum output power, while complying with Euro 1 emission standards.

PW Pump
Max Displacement 1.5 Liters/cylinder
Max Output Power 45KW /cylinder
Emission: Euro 1

Product Overview

High-Performance Fuel Injection Pump

This high-pressure fuel injection pump is engineered for demanding industrial and automotive diesel applications. It offers reliable fluid transfer and precision pressure control, ensuring consistent performance under various operating conditions. With its robust construction and durable components, this unit is designed for minimal maintenance and long-term operational efficiency.

Technical Specifications

Emission Standard

Euro 1

Max Displacement	1.5 Liters/cylinder
Max Output Power	45 KW/cylinder
Material Composition	Durable Metal

Application Suitability

Suitable Engines

- Industrial Diesel Engines
- Automotive Diesel Engines
- Heavy Machinery Systems
