

High-Pressure Gas Cylinder Storage Unit

This high-pressure gas cylinder storage unit provides organized storage for multiple cylinders. It is designed for industrial applications requiring safe gas containment.

Overview

Industrial Gas Cylinder Storage Solutions

This high-pressure gas cylinder storage unit is engineered for the secure and organized containment of multiple gas cylinders in demanding industrial environments. Designed with safety and efficiency in mind, the enclosure provides a robust protective barrier for high-volume gas storage. Available in two distinct configurations, these units offer scalable capacity to meet various operational requirements.

Technical Specifications

Model Comparison

Model	Cylinder Config	Total Volume (L)	Weight (kg)	Dimensions (mm)
FJTW1	1279-18pcs-80 L	1440	2400	2320x1606x1340
FJTW2	1279-27pcs-80 L	2160	3600	2210x1896x1600

Gas Capacity Metrics

363 M³

Model FJTW1 Gas Capacity

544 M³

Model FJTW2 Gas Capacity
