

High-Pressure Industrial Brass Valve with Pressure Gauges

This high-pressure industrial valve allows precise control and monitoring of fluid flow. It features a robust brass body with flanged connections and two pressure gauges for real-time pressure readings.

Product Overview

Industrial Precision Control

This high-pressure industrial brass valve is engineered for demanding environments requiring precise fluid flow control and real-time monitoring. The robust brass construction ensures long-term durability, while the integrated dual-pressure gauge system allows operators to monitor performance with high accuracy. Designed with an adjustable top-mounted mechanism, this valve provides the fine-tuning capabilities essential for diverse industrial piping applications.

Technical Specifications

Material	Brass
Connection	Flanged
Integrated Gauges	2

Performance Data

Key Performance Metrics

0.4 MPa Minimum Pressure	1.6 MPa Maximum Pressure
------------------------------------	------------------------------------

Pressure Calibration Range

Metric	Value
Lower Range	0.4 MPa
Intermediate Range	0.8 MPa
Upper Range	1.6 MPa

Features

Key Features	High-Pressure, Industrial Grade, Adjustable Flow, Safety Monitoring
