

High-Pressure Mud Pump Module

This mud pump module is constructed from premium materials. It is exchangeable with OEM products and meets API-7K specifications.

Overview

High-Pressure Mud Pump Module

Engineered for demanding oil and gas drilling environments, this high-pressure mud pump module is built to deliver reliable performance and seamless integration. Every unit is designed to be fully exchangeable with standard OEM equipment, ensuring compatibility within existing drilling systems. Constructed from high-grade premium materials, these modules are manufactured to meet or exceed rigorous industry standards for safety and durability.

Standards & Compliance

Compliance Standards

API-7K, API Certified

Technical Details

Compatibility & Design

- Fully exchangeable with OEM products
- High-grade premium material construction
- Engineered for high-pressure fluid transfer
- Integrated pressure regulation points

Model Identifier

7K-0448

Applications

Primary Applications

Oil Drilling • Gas Drilling • Fluid Transfer • Pressure Regulation
