

High-Pressure Power Sprayer for Agriculture

This high-pressure power sprayer is designed for agricultural and industrial applications. It delivers a consistent spray pattern for efficient coverage of pesticides, herbicides, and other liquids.

Product Overview

High-Pressure Agricultural Sprayer

This high-pressure power sprayer is engineered for demanding agricultural and industrial applications, offering robust performance for pesticide and herbicide distribution. Constructed with a durable red-painted pump housing and corrosion-resistant brass components, it ensures long-term reliability in harsh environments. The unit features an integrated pressure regulator and gauge, allowing operators to achieve precise pressure control and a consistent spray pattern for efficient, uniform coverage.

Technical Specifications

Key Features

- High-pressure output
- Corrosion-resistant brass components
- Integrated pressure regulator
- Precise pressure gauge
- Sturdy base for operational stability

Construction Materials

Brass Components • Red-Painted Housing • Sturdy Metal Base

Primary Applications

Agriculture, Industrial, Pesticide Application, Herbicide Application
