

High Pressure Power Washer

This high-pressure washer features a robust engine and durable frame. It is equipped with various nozzle attachments and wheels for easy maneuverability, suitable for both residential and commercial use.

Overview

Professional Cleaning Performance

This high-pressure washer is engineered for demanding cleaning tasks, combining a powerful 212cc gasoline engine with a robust aluminium pump. Designed for efficiency and reliability, it meets Euro-V compliance standards for cleaner operation. With a maximum pressure of 240Bar and a consistent water flow of 11L/min, it provides the versatility needed for both residential and commercial applications.
