

# High-Pressure Power Washer for Professional Use

This high-pressure power washer is designed for professional and heavy-duty cleaning. It features a robust frame with integrated wheels for easy maneuverability and versatile cleaning applications.

## Product Overview

### Built for Heavy-Duty Performance

This high-pressure power washer is engineered for demanding industrial, agricultural, and construction environments. It features a robust design with a brass triplex crankshaft plunger pump and ceramic-coated plungers for maximum durability. Equipped with an integrated wheel and handle assembly, it ensures professional-grade mobility and ease of use in diverse settings.

## Technical Specifications

Pump Architecture	Brass triplex crankshaft plunger pump
Plunger Coating	Coated ceramic
Sealing Technology	Double water sealing structure
Regulation	Built-in pressure regulator valve

## Operational Features

Filtration	Double water inlet filter device
Self-suction	Yes
Model Identifier	M93A.E

## Mobility and Design

Portability Features	Integrated wheels, Ergonomic handle, Mobile frame
