

High-Pressure Sodium Street Light

This high-pressure sodium street light is designed for efficient and reliable outdoor lighting. It features a durable housing and optimized reflector for uniform light distribution.

Overview

Reliable Outdoor Illumination

This high-pressure sodium street light luminaire is engineered for efficient and dependable outdoor lighting performance. Featuring a durable housing and an optimized reflector, it ensures uniform light distribution across roadways, parking lots, and public spaces. Built for longevity, this solution offers consistent illumination while maintaining energy efficiency for demanding municipal and commercial environments.

Technical Specifications

Light Source	High-Pressure Sodium (HPS)
Recommended Applications	Roadways, Parking Lots, Public Areas

Design Features

Key Features

- Durable housing construction
- Optimized reflector for uniform light distribution
- Protective lens

Performance Benefits

Long-lasting performance • Energy saving • Reliable outdoor operation
