

High-Pressure Spray Hose

This high-pressure spray hose is designed for demanding applications. It features an 8.5mm inner diameter and a burst pressure (BP) rating of 20 MPa.

Product Overview

Professional-Grade High-Pressure Spray Hose

This high-pressure spray hose is engineered for demanding applications, ranging from agricultural chemical spraying and orchard maintenance to industrial cleaning and pneumatic devices. Built with a specialized inner layer that is resistant to acids, alkalis, and chemicals, it ensures longevity and reliability. Featuring a high-density fiber-reinforced intermediate layer, this hose is designed to withstand extreme environmental conditions, including high temperatures and intense UV exposure, while maintaining flexibility for easy operation.

Technical Specifications

Burst Pressure

160 KG

Burst Pressure

20 MPa

Rated Burst Pressure (MPa)

Inner Diameter

8.5 mm

Construction & Materials

Material Composition

- Anti-acid inner layer
- Anti-alkali inner layer
- Drug-fast plastic material
- High-density, high-tensile fiber weaving
- UV-resistant surface coating

Key Features

Wear-resistant, Flexible, UV-resistant, Chemical-resistant, Durable

Compatibility & Usage

Application Areas

Agriculture • Orchard Spraying • Pneumatic Devices • High-Pressure Cleaning • Civil Engineering • Marine

Customization Options

Joints in different specifications and international standards can be customized upon request.
