Product Overview

Efficiency Meets Durability

This high-pressure sterilizer offers an efficient solution for eliminating germs in just 40 minutes. Engineered with high-strength aluminum alloy, it ensures durability while remaining lightweight for practical use. The system features a large 9.5-liter capacity across three layers, making it suitable for both medical instruments and household items like baby bottles.

Technical Specifications

Total Capacity	9.5 L
Standard Cycle Time	40 min
Construction Material	High strength aluminum alloy
Pressure Gauge Range	-0.05 to 0.25 MPa

Safety & Performance

Suitable Applications

- Medical instruments
- Dishware
- Baby bottles

Safety Systems

Eight core protection, Pressure safety control system
