

High-Pressure Triplex Plunger Pump

This high-pressure triplex plunger pump is designed for pressure washers and industrial applications. It utilizes a crankshaft-driven plunger mechanism to ensure efficient fluid displacement.

Overview

High-Performance Triplex Plunger Pump

This high-pressure triplex plunger pump is engineered for demanding industrial cleaning applications and pressure washer systems. Featuring a robust crankshaft-driven mechanism, it ensures reliable fluid displacement and long-term durability. The internal design includes precision-engineered components such as ball bearings, connecting rods, and high-quality seals to maintain consistent pressure under intense operating conditions.

Performance Metrics

Flow Rates

14.5 L/min

Flow at 1450 RPM

17.5 L/min

Flow at 1740 RPM

Technical Details

Key Design Features

- Triplex plunger configuration
- Crankshaft-driven mechanism
- Heavy-duty ball bearings
- Durable inlet and outlet valves
- Wear-resistant seals

Common Applications

Pressure Washers, Industrial Cleaning, Fluid Transfer
