

High-Pressure Washer Pump with Brass Ports

This high-pressure washer pump features a robust motor and a multi-piston pump head. It is designed for efficient water delivery and high-pressure output, with multiple brass-fitted ports for connections.

Product Overview

High-Performance Washer Pump

This high-pressure washer pump is engineered for demanding cleaning tasks, featuring a robust motor and a precision-engineered multi-piston pump head. Built for reliability, it includes durable brass-fitted ports for both inlet and outlet connections to ensure high-pressure output and consistent water delivery. Housed in a protective casing, this unit is designed to provide long-lasting performance in professional environments.

Technical Specifications

Model	HCD8860-20481
Input Power	AC 120V / 60Hz
Lot Number	060122 0038

Construction & Design

Port Material	Brass
Mechanism	Multi-piston pump head
Key Features	Protective Housing, Heavy Duty Motor, High Pressure Output
