

High-Pressure Water Jetting Machine

This high-pressure water jetting machine is designed for heavy-duty cleaning applications. It features a robust engine, a high-pressure pump, and a durable frame with wheels for easy maneuverability.

Overview

High-Performance Drain Cleaning Solution

This high-pressure water jetting machine is engineered for heavy-duty drain cleaning in lines ranging from 50mm to 250mm (2 to 10 inches). It features a powerful 16.3KW (22HP) gasoline engine and delivers a working pressure of 3600psi, making it ideal for clearing long drain lines up to 60 meters. The unit is mounted on a four-wheel chassis with an integrated hose reel for superior maneuverability and ease of use in professional environments.

Performance Metrics

Key Performance Metrics

3600 psi

Working Pressure

34 lpm

Flow Rate

16.3 KW

Engine Power

Technical Specifications

Operating Range	50-250mm (2 to 10 inches) diameter, up to 60m (200ft) length
Machine Weight	158 Kgs
Key Features	Pulse Technology, Four-Wheel Chassis, Integrated Hose Reel, Foot Pedal Control

Accessories

Available Jetter Nozzles

Description
30° Propulsion Nozzle for 1/4"
30° Propulsion Nozzle for 3/8"
30° Propulsion Nozzle for 1/2"
15° Penetrating Nozzle for 1/4"
15° Penetrating Nozzle for 3/8"
15° Penetrating Nozzle for 1/2"
Drop Head Nozzle for 1/8"
Drop Head Nozzle for 1/4"

Available Jetter Hoses

- 3/8" x 35' (9.5mm x 10M)
- 1/4" x 200' (6.35mm x 60M)
- 3/8" x 200' (9.5mm x 60M)
- 1/2" x 200' (12.7mm x 60M)

Turbo Nozzle Options

- Brass Turbo Nozzle (4000psi/275bar)
- Brass Turbo Nozzle (5000psi/345bar)
