Product Overview

High-Performance HDMI Connectivity

This high-speed fiber optic HDMI 2.0 cable is engineered for seamless, high-bandwidth signal transmission, supporting 4K resolution at 60Hz. Designed for durability and flexibility, it features a zinc alloy shell and gold-plated connectors to ensure stable, interference-free connectivity. It is an ideal solution for connecting high-end gaming consoles, media players, and computers to UHD displays, projectors, and TVs.

Performance Metrics

Bandwidth

18 Gbps

Data Transfer Rate

Video Support

4K@60Hz, HDR10, Dolby Vision, 3D, RGB 4:4:4, HDCP 2.2, ARC

Construction & Design

Build Materials

- Fiber optic glass core
- Zinc alloy shell
- 24K Gold-plated plugs

Bending Radius

20 mm

Compatibility & Usage

Compatible Devices

- 4K Blu-ray Players
- Gaming Consoles (PS4, PS3, Xbox One, Xbox 360)
- Media PCs
- Apple TV
- Roku Ultra
- UHD TVs & Projectors

Installation Requirement

Directional cable: 'Source' plug connects to output devices (players/consoles); 'Display' plug connects to display devices (TVs/monitors).
