

High-Speed Banknote Counter with Counterfeit Detection

This high-speed banknote counter is designed for accurate and efficient money processing. It features counterfeit detection, batch counting, and variable counting speeds.

Product Overview

Professional Cash Handling Solution

This high-speed banknote counter is designed for accurate and efficient money processing in high-volume environments like banks and retail businesses. It features advanced multi-sensor technology for reliable counterfeit detection and precise counting. With a robust feeding mechanism and user-friendly interface, it minimizes errors and operational jams while supporting a variety of international currencies.

Performance Metrics

Counting Speed

1000 notes/min
Max Counting Speed

Hopper Capacity

200 notes

Detection Technology

Detection Systems

Magnetic (MG), Infrared (IR), Watermark (WM), Ultraviolet (UV)

Operational Features

Key Functions

- Automatic start and stop
- Automatic clear performance
- Intelligent transforming
- Batch counting (piece presetting)
- Automatic trouble examining
- Automatic zero clearing
- Double note detection
- Half note detection
- Chain note detection

Supported Currencies

Euro • US Dollar • HK Dollar
