

High-Speed BLDC Motor for Vacuum Cleaners

This is a high-speed, small-size BLDC motor designed for vacuum cleaners. The motor provides efficient performance and a compact design, making it suitable for modern vacuum cleaner applications.

Product Overview

High-Performance Vacuum Solution

This high-speed brushless DC (BLDC) motor is specifically engineered for modern vacuum cleaner applications where space is at a premium and airflow performance is critical. Its compact architecture allows for integration into slim vacuum designs without sacrificing suction power. Built for efficiency, this motor ensures reliable operation and longevity for professional and consumer-grade cleaning equipment.

Technical Specifications

Motor Technology	BLDC (Brushless Direct Current)
Key Performance Attributes	High Speed, Compact Size, High Airflow

Performance Metrics

Core Performance Metrics

<p>1 Yes High-Speed Operation</p>	<p>1 Yes High Airflow Efficiency</p>
