Overview

High-Performance Blender Motor

This universal AC/DC motor is engineered specifically for commercial-grade blenders, juicers, and mixers. Designed for reliability and high-speed operation, it features robust construction suitable for demanding kitchen environments. The unit includes advanced thermal protection and is adaptable to various voltage and power requirements to meet specific application needs.

Electrical Specifications

Voltage Range	110V - 240V
Frequency	50/60Hz
Insulation Class Options	Class B, Class E, Class F, Class H

Safety & Protection

Protection Mechanisms

- Thermal fuse device
- Optional reset function

Performance & Customization

Key Performance Metrics

0 Watts (Customizable)
Power Rating

0 RPM (Customizable)
