

High-Speed CNC Machining Center

This high-speed machining center is designed for precision and efficiency in metalworking. It features a robust structure, advanced control system, and high-speed spindle.

General Overview

Precision Machining Excellence

This high-speed machining center is engineered for precision and efficiency in demanding metalworking applications. Featuring a robust structure, an advanced control system, and a high-speed spindle, it delivers optimal material removal rates and superior surface finishes. It is an ideal solution for industries such as aerospace, automotive, and mold making.

Technical Specifications

Suitable Industries

- Aerospace
- Automotive
- Mold Making

Model Designation

VMC 8500

Key Capabilities

High-Speed Spindle, Automatic Tool Changer, Advanced Control System, Integrated Coolant System

Quality Assurance

Quality Standard

High Quality
