

High-Speed Currency Counting Machine with Counterfeit Detection

This high-speed currency counting machine is designed for accurate and efficient money processing. The machine features counterfeit detection, batch counting, and error detection.

Product Overview

High-Efficiency Currency Processing

This high-speed currency counting machine is engineered for professional environments such as banks, retail businesses, and other cash-handling operations. It streamlines money processing tasks by combining rapid counting capabilities with advanced counterfeit detection technology. Designed for reliability and accuracy, it features batch counting and error detection to ensure seamless workflow management.

Core Performance

Key Performance Indicators

1000 notes/min
Counting Speed

Counterfeit Detection

UV Detection, MG Detection, Error Detection

Operational Features

Operational Modes

- Batch Counting
- Automatic Start/Stop
- Error Detection

Target Use Cases

Applications

Banking • Retail Stores • Cash Management • General Business
